

IN THE SPECIFICATION

Please amend the paragraph at page 1, lines 31-32, as follows:

DE 10229732 (~~PF 53679~~) describes the use of polymer layers of this type in elements of visual displays.

Please amend the paragraph at page 13, lines 36-38, as follows:

It is possible to prepare core/shell particles with a core: envelope ratio of 1:1. Table [[1]] 2 shows the properties of core/shell particles and of the films produced from the dispersions. In Table 2, film color (p) is the film color when observed in a direction perpendicular to the film surface; film color (o) is the film color when observed in a direction oblique to the film surface.
